ABSTRACTED-PUB-NO: JP 10222428 A

BASIC-ABSTRACT:

The system (1) includes a server computer (3) and several client computers (7) which are connected in a network. The client computer is permitted to use a content of data present in the server computer.

The server computer manages the process of giving license to the client computer to use the content. The server computer also releases the license for the client computer to read the content when the client computer usage time is over.

USE - For software production company.

ADVANTAGE - Ensures secret nature of data. Improves users efficiency.
